# INTRODUCING **CARGO**

The heavy-duty ebike designed for industrial use.

See page 44-45.

1993

### THE BEGINNING

A garage turned into a bicycle warehouse

1994

### EARLY EXPANSIONS

Increasing demands required a larger assembly plant

1996

### ON THE EDGE OF SUCCESS

Changing from small business to Ltd., the main focus of our business policy is on producing quantities

1998

### INTERNATIONAL APPEAR- ANCE

Acquired ISO 9002 certification, the main focus is now on quality

2004

### FURTHER DEVEL- OPMENTS, BRAND STRENGTHENING

Our export market is continuously extended

2008

### GEPIDA IS A KNOWN AND RECOGNIZED BRAND, SPECIAL PRODUCT DEVELOPMENTS

We enter new markets with the development of our own GPDS system

2010-2013

### DEVELOPMENT AND GROWTH CONTINUE

Own mobile application, battery charger unit, newly introduced painting technology, GPDS Kit

2014-2016

### GLOBAL EXPANSION

New markets for ebikes: Australia, New Zealand, Belgium, Ireland, Romania, Spain and Italy.

Safety becomes the major focus of product development at Gepida. New technologies and product designs appear with rider safety as a priority.

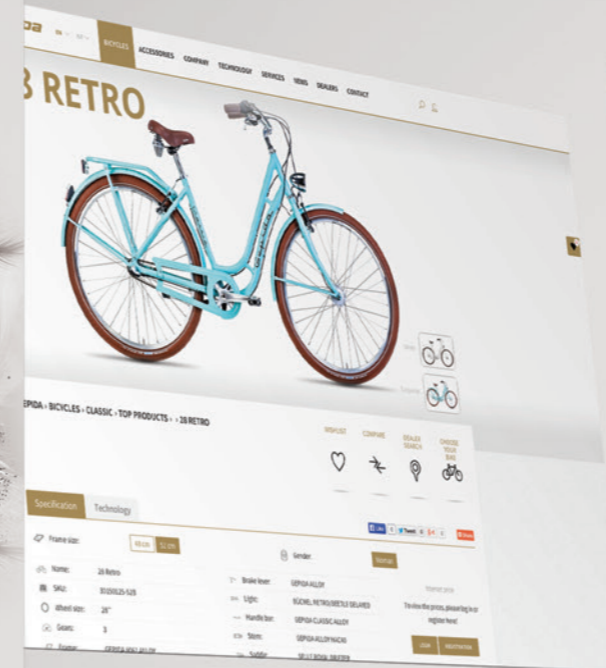

The development of unique products, such as the Cargo and the Miliare ebikes begins.

# THE SHORT HISTORY OF THE GEPIDAS

There is no objective written evidence of their origins or prehistory. The Gepidas and the Goths spoke the same language, but probably different dialects. They never interbred and relations between them were tense. The Gepidas were of average size, with compact neat figures quite like the northern type, although transient types appeared later on. The first unequivocal archaeological traces of this ethnic group come from the 2nd-3rd century and can be followed up to the estuary of the Vistula River. They were presumably of Eastern German origin, and considered themselves rich and generous. They first appeared in the Carpathian Basin in the 3rd-4th century, around the Szamos, Tisza and the Körös Rivers. They made regular excursions from there towards the East and South. At times they had substantial power and they fought the Goths and other ethnic groups for important territories. The Gepidas were initially ruled under a federal tribe system and lived in village communities. The real power was held by the folk convention, which was a union of the armed forces. They elected a king only in certain important historical situations.

They were conquered by the Huns when the Hun kingdom and empire evolved, but they managed to maintain their self-identity: they become allies of Attila. After Attila's death the Gepidas probably also acquired the Hun kingdom's treasury, occupying significant territories in all directions, and were recognised by the Byzantine Empire. The Byzantine Emperor greeted the Gepidas as his ally, and through commercial connections, the Gepidas became prosperous. Further conquests and defeats, large geo-political shifts and inner power conflicts caused the central power to weaken, and affected the formation of more royal courts. In light of this, a uniform regiment came into existence in the 6th century. In the middle of the 6th century the Gepidas occupied the Byzantine city of Sirmium, where they established their royal court and treasury. Byzantium revoked their annual grant and made a confederation with the Longobards, providing them with important territories in the old Goth Pannonia.

The two Germanic ethnic groups, the Gepidas and the Longobards, fought each other for around 30 years, and the less well armed Gepidas suffered defeats against the Longobard cavalry. They lost the Byzantine territories they had occupied, but kept hold of Sirmium, where the first early medieval silver coins of the Carpathian Basin were made. Later on Byzantium breached the agreement with the Longobards as well, and attacked the Gepida territory together with their new allies, the western refugee nomad Avar ethnic groups. The Gepida army suffered a devastating defeat, their king was killed, and their treasury was safely removed to Byzantium, while the population moved to Italy. Under the large-scale Avar occupation, the Gepidas were essentially wiped out, with only smaller Transylvanian centres surviving. However, during the 7th century these small groups were all subsumed by other ethnicities in the region. The most significant of the Gepida graves that have been unearthed are in Szilágysomlyó in Transylvania, where the royal treasures – presumably from the reign of the Hun Empire – were buried.

Besides having a more user-friendly approach, we wanted to enhance your browsing experience and added several useful features to our website.

Registered users can now add the products they like to a Customer Wishlist which can then be easily sent to a dealer located manually or automatically by our dealer locator. The chosen dealer then contacts the customer to discuss further questions and share all information about the product.

Placing the products on the Wishlist doesn't mean a commitment to the purchase. Using this function the customer shows his interest about our products. Based on these inquiries, customers can get further information from the chosen dealer (e.g. availability, shipping time, prices, etc.) and a purchase can be arranged.

# GEPIDA WITH THE BOSCH EBIKE SYSTEM

The Bosch ebike system is the leader of ebike systems on the European market. The „tailwind” effect provided by the BOSCH ebike system currently brings momentum to 50 top European brands including Gepida. Engineers of the Bosch ebike system are continuously developing their unique and powerful solutions for the electromobility sector to meet the highest expectations of performance and comfort.

DISPLAY (Intuvia)

With the on-board computer Intuvia, you control your ebike experience easily and intuitively – directly on the device or using the separate control unit on the handlebar. The display, which is easy to read even in sunlight, informs you reliably about range, trip time, average speed, and much more.

DISPLAY (Nyon)

Nyon is the world's first onboard computer for the eBike, combining all functions in one device. From providing current speed, cadence or range data to navigating by GPS or analyzing your personal fitness, Nyon keeps you optimally informed throughout every ride with a wide array of innovative features. It's exceptionally quiet, quickly rechargeable and sized for your trouser pocket. Together with the eBike-connect.com portal and the app for Android and iOS smartphones, Nyon offers next-generation eBike connectivity.

DRIVE UNIT (electric motor)

Bosch ebike drive systems are designed for maximum ergonomics. The compact gear arrangement allows for optimal integration of the Drive Unit into the frame design, giving you more ground clearance. The reduced volume makes the drive more lightweight.

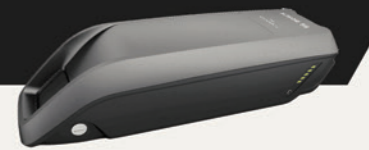

Due to the precise motor control and the rapid processing of sensor signals, the Drive Unit is optimized for minimal noise and vibration. The secure chain run helps to keep the chain from being disengaged or subjected to undue strain. This reduces wear and maximizes comfort. In addition, the Drive Unit is extremely sturdy thanks to the integrated rock guard and spray water protection.

POWERPACK (Battery)

BOSCH batteries are designed to be the lightest ebike batteries available with unrivaled energy density. The weight of the battery is so light, it is practically negligible during riding. Thanks to the handle and mount, the batteries can be easily inserted and removed again. The only thing easier is charging the PowerPacks directly on the ebike. The Battery Management System (BMS) reliably protects your battery against overload, undervoltage, overheating, and short circuit. A long service life with high mileage is something you can count on. Lithium-ion batteries have neither memory nor self-discharge effects. This means that the PowerPacks can also be partially recharged at any time – without affecting the service life.

## BOSCH EBIKE SYSTEM TYPES

**BOSCH ACTIVE** **Active Line** – the harmonic ebike system  
With Active Line products Bosch provides versatile and customized products for the modern electric bike users. The cyclist can cover greater distances and can achieve more mobility during the every day life with the available „tailwind” effect. The Active Line is ideal for freetime cyclists, for city and tour riders.

Voltage (V)	36 V	36 V
Energy Content (Wh)	400 Wh	500 Wh
Capacity (Ah)	11,0 Ah	13,8 Ah
Charging Time 50%	1,5 h	2 h
Charging Time 80%	2 h	3 h
Charging Time 100%	3,5 h	4,5 h

**BOSCH PERFORMANCE** **Performance Line** – the sporty ebike system  
As the name also suggests, the essence of this system is pure performance. Created for sporty and powerful cycling, suitable for accelerating on uphill and also riding on flat terrain. Thanks to the precision engineering of the system, the assistance from the drive unit is combined with the performance of the rider in the most harmonic way providing a sporty support on all terrain and in any speed range.

**BOSCH PERFORMANCE CX** **Performance CX Line** – the model for high performers  
This all new ebike system introduced to the market in 2016 is designed to meet the needs of those who want to take their rides one step further. The Performance CX line is a high-performance system with up to 300% support from the drive unit. The drive unit features a rugged and compact design, concentrated power, and an extremely durable powder coating.

# SHIMANO Di2

SHIMANO INTRODUCED THEIR VERY FIRST ELECTRONIC GEAR SYSTEM (DURA ACE 7970) BACK IN 2008. THIS WAS REVOLUTIONARY AS THEY PROVIDED A COMPLETE SYSTEM FOR RACERS AND TO CUSTOMERS WHO WERE OPEN TO THE IDEA OF THE NEW SYSTEM. IN 2011, SHIMANO INTRODUCED THE ELECTRONIC ULTEGRA SET AS WELL, WHICH INCREASED THE POPULARITY OF THE DI2 SYSTEM.

BASED ON CUSTOMER AND MARKET FEEDBACK THE RANGE HAS EXPANDED AND DEVELOPED. IN 2016, NON-PERFORMANCE ORIENTED RACERS CAN NOW ALSO TAKE ADVANTAGE OF ELECTRONIC GEAR-SHIFTING. THANKS TO THE NEXUS DI2, UPPER MIDDLE RANGE CITY BIKE USERS CAN ALSO ENJOY THIS KIND OF SHIFTING.

THE NEW DI2 SYSTEM WHICH HAS ALREADY PROVEN ITS SUCCESS IN PROFESSIONAL CYCLING IS ALSO IDEAL FOR EVERYDAY USE: IT IS COMPACT, PRECISE AND EASY TO OPERATE IN ORDER TO ENHANCE THE EXPERIENCE OF CYCLING FOR EVERYONE.

HERE AT GEPIDA, WE ALSO WANTED OUR CUSTOMERS TO TAKE ADVANTAGE OF THIS ADVANCEMENT IN SHIFTING TECHNOLOGY. THIS SYSTEM IS BUILT INTO THE REPTILA 1000 DI2 MODEL, WHICH WE HIGHLY RECOMMEND TO EVERYONE OPEN TO THE IDEA OF SMOOTH AND FAST GEAR-SHIFTING.

## SPECIFICATION

# GEPIDA ELECTRO-LUMINESCENT DECALS

Over the past years the Gepida R&D Team has developed many new technical solutions for e-bikes. Our latest development is an electroluminescent (EL) decal that can be placed under the lacquer. The decal looks like an ordinary one, but its EL properties make it extraordinary, especially in dark or sunset conditions.

## WHAT DOES ELECTROLUMINESCENCE MEAN?

Electroluminescence (EL) is an optical and electrical phenomenon in which a material emits light in response to the passage of an electric current or to a strong electric field.

## WHAT IS THE GEPIDA EL DECAL?

- new technology for bike frame decals
- combination of under lacquer and water decal solutions
- special EL decal design in harmony with the water decals
- low energy supply needed for high brightness

## PHYSICAL PROPERTIES:

- blue/green EL light source spectrum of 492 nm at peak wavelength, with quite high, 85 nm spectral bandwidth
- powered from the 6V of the bicycle's light
- 8,000 hours life span
- high efficiency, low energy consumption

# CARGO

The world is constantly changing, which calls for solutions to the new ideas and demands that arise every day. We, at Gepida, are determined to provide a sustainable alternative for motorised vehicles that have high emission of CO2 and other harmful substances. In addition to satisfying the public's dynamically increasing demand for eBikes, we wanted to develop a product for players in the industry and other professionals that enables the transportation of such oversized tools and packages that were transported by bicycles and scooters. We offer a complex solution to those who want to move Cargo efficiently, without pollution, indoors, or in limited access areas. The Cargo makes it possible to work in areas that are difficult or impossible to access by cars.

Last, but not least, work will be less work-like with the use of an electric bicycle.

ACCESSORIES

## GEPIDA ORIGINAL ACCESSORIES

FOR 5 YEARS NOW, WE HAVE BEEN OFFERING ACCESSORIES THAT MATCH OUR BICYCLES IN STYLE AND QUALITY. WE AIM TO FOLLOW THIS PATH, MOREOVER, WE ARE PROUD TO PRESENT A NEW ASSORTMENT FOR THE 2017 SEASON. THE NEW ELEMENTS AND VIBRANT COLOURS APPEARING ON OUR BICYCLES WILL ALSO BE REFLECTED ON THE ACCESSORIES.

FROM THE SELECTION OF THE BEST MATERIALS TO THE SMALLEST DETAILS, WE CREATE OUR ACCESSORIES SO THAT YOU CAN ACHIEVE WHATEVER RIDING GOALS YOU HAVE.

WHEN WE CREATED THE COMFORTABLE, BUT AT THE SAME TIME FUNCTIONAL CLOTHING ACCESSORIES WE AIMED FOR YOU TO FORGET WEARING ANYTHING. THIS IS THE GUARANTEE FOR THE MOST COMFORTABLE RIDING EXPERIENCE. LET IT BE A RIDE WITH FRIENDS, OR A COMPETITION, OUR GOAL IS ALWAYS TO PROVIDE THE BEST KIT.

## GEPIDA HELMETS

WE DO NOT NEED HELMETS OFTEN, BUT WHEN WE DO, THEY CAN SAVE LIVES. WE SHOULD ALWAYS WEAR A HELMET WHEN WE RIDE ON THE TRAILS OR IN THE CITY. PROTECTING OUR HEAD IS THE KEY, THE HOT WEATHER OR CANNOT BE AN EXCUSE. DUE TO THE ERGONOMIC DESIGN AND THE PRECISE MICRO-METRIC ADJUSTING SYSTEM, THE HELMET FITS PERFECTLY, SO NO COMPROMISES NEED TO BE MADE. THE DETACHABLE AND WASHABLE ANTI-BACTERIAL PADDING CHANNELS SWEAT AND DRIES QUICKLY.

THE SYSTEM OF MASSIVE VENTS ENSURES IMPRESSIVE VENTILATION. THE INTERIOR CHANNELLING NOT ONLY PROVIDES MAXIMUM COOLING POWER, BUT OPTIMAL AIRFLOW. THE INTERCHANGEABLE BUG-NET PROTECTS FROM INSECTS.

YOU CAN CHOOSE THE HELMET THAT FITS YOUR RIDING STYLE AND FIELD OF USE THE MOST.
